Shape	Overmolded
Short Description	RFID Tags with integrated fasteners prevent tampering with the contents of sealed containers.
Long Description	Seal Tag transponders are ideal for sealing commercial containers – bags, bins or boxes – to prevent unauthorized access to contents while in storage or during distribution. Seal Tag units integrate powerful RFID chips with high durability components, and secure, visually tamper-evident fasteners that are quick and easy to fix. Access to a sealed container's contents requires severing a tag's cable tie or breaching of the container itself – providing clear evidence of tampering.
