Name	SEAL TAG
Material	Polyamid
Shape	Ultrasonic Welded
Short Description	RFID Tags with integrated fasteners prevent tampering with the contents of sealed containers.
Long Description	TECTUS Seal Tag transponders are ideal for sealing commercial containers – bags, bins or boxes – to prevent unauthorized access to contents while in storage or during distribution. Seal Tag units integrate powerful RFID chips with high durability components, and secure, visually tamper-evident fasteners that are quick and easy to fix. Access to a sealed container's contents requires severing a tag's cable tie or breaching of the container itself – providing clear evidence of tampering. This version is highly ruggedized to support mining or oil & gas applications and be fixed onto metallic objects.
